INDEX TO VOLUME 48

ARTICLES

Achievement in Eighth Grade Science by Heterogeneous and Homogeneous Classes, Laddie J. Bicak, 13–22.

Adventures in a Police State, Otto J. M. Smith, 2339–248.

African Education in Northern Rhodesia, Robert Adrian Bullington, 320–326.

Aids for Teaching Science: Evidences of a Good Science Program, Specialists for Science, Elementary and Secondary Education, Bureau of Educational Research and Development, 133–138.

Analysis of Errors of Pupil Teachers Teaching General Science in Criticism Lessons, An, Sri Bishnu Prasad Jena, 488–490.

Andreas Osiander: Lover of Science or Appeaser of Its Enemies, Mark Graubard, 168–187.

Audio-Visual Materials, Some Common Problems in the Use of, Pearl A. Nelson and Gaylen B. Kelley, 37–41.

Bibliography of Current Films and Filmstrips in Elementary Science (1955–1962), Pearl A. Nelson and Gaylen B. Kelley, 42–59.

Bicultural Children and Science Achievement, C. M. Charles, 93–96.

Burden of Learning: Student or Teacher, Robert Behling, 22–23.

CESI History and Presidents, Clarence M. Pruitt, 312–314.

CESI—Science Education: End of an Era, Clarence M. Pruitt, 311–312.

Characteristics of Persons Submitting Applications in 1962 for Participating in NSF Institute Programs at the University of Georgia, Charles L. Koelsche, 31–36.

Compact Item Analysis of Classroom Tests: A Brief Supplement to Bennett's "Simple Use of Statistics," Robert B. Smawley, 427–430.

Comparison of Televiewing and Non-Televiewing Children's Explanations of Natural Phenomena, A, Frank Smith, 90–93.

Content Study of Earth Science Courses in Selected Secondary Schools, A, John M. Chapman and Loren T. Caldwell, 430–436.

Controlled Camping or USSR in Heterospect, Otto J. M. Smith, 262–275.

Council for Elementary Science International: Summary of Conference, Katherine E. Hill, 85–86.

Courses of Study in Chemistry at the Secondary Level in Länd Hesse, Bavern, and Baden-Wüertemburg, Germany, Charles J. Routh, 370–375.

Cyrus Wallace Barnes, Clarence M. Pruitt, 393–394.

Education in Nauru, Howard Nechamkin, 383–390.

Effecting Changes in the Elementary Science Curriculum of a School System, Anne B. Hopman, 101–109.

Elementary Science Bibliography, Stanley B. Brown, 109–116.

ESI Elementary Science Activities Project, David Hawkins, 77–78.

Facts and Concepts of Chemistry of Importance for Introductory High School Biology, L. J. Thelen, 447–453.

Ferdinand Atherton Riedel, Clarence M. Pruitt, 315.

George Mimms Rawlins, Clarence M. Pruitt, 316.

Greta Oppe, Clarence M. Pruitt, 97–101.

Impact of Science Fairs on Student Exhibitors, The, L. J. Thelen, 442–446.

Improving the Preparation of Indonesian Secondary School Science Teachers, Henry Gould, 275–295.

Index of Volume 48, 493–500.

Integrating Conservation Education into the Existing Curriculum of the Ann Arbor Public School System (K-12), William M. Stapp, 419–424.

International Study Program of the California State Colleges, Karl and Doris F. Falk, 326–330.

Investigation of the Status of Science Education in Selected Public Elementary Schools of Virginia, An, William D. Hedges and Mary Ann MacDougall, 59–64.

James Claude Adell, Clarence M. Pruitt, 201–218.

Jean Piaget's Theory of Perception, Gloria F. Wolinsky, 24–28.

Katherine Elizabeth Hill, Clarence M. Pruitt, 1–6.

L'Esprit Polytechnique: Revolutionary France and Its Revolutionary Institutions, W. H. G. Armytage, 378–383.

Lillian Hethershaw Darnell, Clarence M. Pruitt, 305–311.

Look at Some Claims About Russian Science Education, A, Doris F. Falk, 235–239.

Marine Life: For the Fifth Grade, Lloyd M. Bennett, 404–417.

Materials Presented in Discussion Group I, Robert E. Hendricks, 78–79.

National Science Foundation Summer Institute Program, The, Carol J. Smalheer, 424–426.

Necessity for a New Type of Science Interest Study, The, Richard P. Tisher, 478–485.

New Look on the Goals of Teaching Science, A, Sami I. Boulos, 195–199.

New Method of Science Teaching, A, James J. Thompson, 390–392.

Package Tour of Africa, A, Ruth Armstrong, 361–365.

Phlogiston Revisited: Chemical Theories, New and Old, Nathan Feifer, 460–467.

Planetarium and Space Science in the Elementary School, The, Margaret K. Noble, 28–31.

Preparation of Science Teachers in Egypt, Ragy G. Mitias, 223–228.

Prevalence of Applied Science, The, Morris Goran, 395.

Problem Development Method: An Experimental Try-Out in the Teaching of Science in Secondary Schools, The, Rahda Charan Das, 485–488.
Programs: Council for Elementary Science International, 87–90.
Promising Trends for Effecting Needed Changes in Curriculums in Elementary Science, Albert Piltz, 7–12.
Radio in the Elementary School, Sister Mary Constantine, 121–132.
Rapport and the Cyclopean Eye, Charles Flora and Al Swift, 396–404.
Recorder's Report, Group I: Growth in Children's Ability to Conceptualize, Robert E. Hendricks, 80.
Recorder's Report, Group I: The Role of Elementary Science in the Curriculum of the Elementary School, Arthur M. Henry, 81–82.
Recorder's Report, Group III: Creativity Through Science, Elizabeth M. Vaughn, 85.
Recorder's Report, Group III: Programmed Instruction, Radio, and Television as Influences for Change in an Elementary School Curriculum, Hazel Littrell, 83–84.
Recorder's Report, Group V: The Effect of Printed and Audio-Visual Materials on an Elementary Science Curriculum, James Ashley, 82.
Relationship of Two Methods of Teaching to the Development of Critical Thinking by High School Students in Advanced Biology, The, William Kastrinos, 187–195.
Re-Planning of Junior Science Education in West Africa, The, Basil H. G. Chaplin, 366–370.
Report Concerning Some Problems in Secondary Science and Mathematics Education in the Republic of China, A, Dan Saint-Rossy, 468–477.
Requirements in Geology Departments, Roger H. Charlier and Courtland Daley, 375–378.
Reshaping the Curriculum in a World of Science, H. Clark Hubler, 117–120.
Science Education Activities at Texas Woman's University, Lloyd M. Bennett, 491–492.
Science Education in Brazil, Stanley B. Brown, 231–234.
Science Education in Cambodia, Robert Adrian Bullington, 296–304.
Science Education in Europe, Paul A. Wilkinson, 340–344.
Science Education in Nigeria, Edward K. Weaver, 351–361.
Science Education in the Philippines, Clark Hubler, 334–339.
Science Education in the Writings of the Carnegie Foundation, Ragy G. Mitias, 218–222.
Science Education Programs in the Developing Countries of South and Southeast Asia, Charles L. Koelsche, 344–350.
Science: Metaphysic, Method, and Law, Kenneth F. Schaffner, 436–441.
Science Teaching Opportunities Abroad for 1965–66, 314.
Significance of Recent Research in Secondary-School Science Education, The, David Cohen, 157–167.
Simple Use of Statistics as Evaluative Techniques Can Make the Teacher's Job Easier, Lloyd M. Bennett, 138–145.
Some Aspects of Teacher Education in Turkey, Milton O. Pella, 228–230.
Some Common Problems in the Use of Audio-Visual Materials, Pearl A. Nelson and Gaylen B. Kelley, 37–41.
Some Methods of Instruction in High School Physics and Some Goals and Psychological Factors Relating to Them, Rebecca E. Andrews, 146–156.
Some Problems in East German Science Education, Doris F. Falk, 330–333.
Teaching Fourth Grade Science by Means of Programmed Science Materials with Laboratory Experiences, William D. Hedges and Mary Ann MacDougall, 64–76.
Technical Education in Russia, Otto J. M. Smith, 256–261.
Theodosia Hadley, LaVerne Argabright, 316–319.
Unplanned Economy: The USSR's Mistakes, The, Otto J. M. Smith, 248–256.
Why Biology? Daniel McKinley, 454–459.
